**Informed Consent to Chiropractic Services**

- You are the decision maker for your health care. Part of our role is to provide you with information to assist you in making informed choices. This process is often referred to as “informed consent” and involves your understanding and agreement regarding the care we recommend, the benefits and risks associated with the care, alternatives, and the potential effect on your health if you choose not to receive the care.
- We may conduct some diagnostic or examination procedures if indicated. Any examinations or tests conducted will be carefully performed but may be uncomfortable.
- Chiropractic care centrally involves what is known as a chiropractic adjustment. There may be additional supportive procedures or recommendations as well. When providing an adjustment, we use our hands or an instrument to reposition anatomical structures, such as vertebrae. Potential benefits of an adjustment include restoring normal joint motion, reducing swelling and inflammation in a joint, reducing pain in the joint, and improving neurological functioning and overall well-being.
- It is important that you understand, as with all health care approaches, results are not guaranteed, and there is no promise to cure. As with all types of health care interventions, there are some risks to care, including, but not limited to: muscle spasms, aggravating and/or temporary increase in symptoms, lack of improvement of symptoms, burns and/or scarring from electrical stimulation and from hot or cold therapies, including but not limited to hot packs and ice, fractures (broken bones), disc injuries, dislocations, strains, and sprains. In addition, the literature recognizes an association between strokes and chiropractic manipulation of the cervical spine. With respect to strokes, there is a rare but serious condition known as an “arterial dissection” that typically is caused by a tear in the inner layer of the artery that may cause the development of a thrombus (clot) with the potential to lead to a stroke. The best available scientific evidence supports the understanding that chiropractic adjustment does not cause a dissection in a normal, healthy artery. Disease processes, genetic disorders, medications, and vessel abnormalities may cause an artery to be more susceptible to dissection. Strokes caused by arterial dissections have been associated with over 72 everyday activities such as sneezing, driving, and playing tennis.
- Carotid and vertebral artery dissections are rare, with an annual incidence of 2.5 – 4 of every 100,000 people whether they are receiving health care or not. Patients who experience this condition often, but not always, present to their medical doctor or chiropractor with neck pain and headache. Unfortunately, a percentage of these patients will experience a stroke.
- The reported association between visits to a chiropractor or a primary care physician and stroke is exceedingly rare and is estimated to be related in one in one million to one in two million visits.
- It is also important that you understand there are treatment options available for your condition other than chiropractic procedures. Likely, you have tried many of these approaches already. These options may include, but are not limited to: self-administered care, over-the-counter pain relievers, physical measures and rest, medical care with prescription drugs, physical therapy, bracing, injections, and surgery. Lastly, you have the right to a second opinion and to secure other opinions about your circumstances and health care as you see fit.
- I have read, or have had read to me, the above consent. I appreciate that it is not possible to consider every possible complication to care. I have also had an opportunity to ask questions about its content, and by signing below, I agree with the current or future recommendation to receive chiropractic care as is deemed appropriate for my circumstance. I intend this consent to cover the entire course of care from all providers in this office for my present condition and for any future condition(s) for which I seek chiropractic care from this office.

**Informed Consent to Massage Therapy Services**

- I hereby consent to massage therapy to be performed by affiliate Massage Therapist within the office and acknowledge that if I experience any pain or discomfort within the massage session
- I have read, or have had read to me, the above consent. I consent to the opportunity to ask questions about its content, and by signing below I agree to the above-named procedures. I intend this consent form to cover the entire course of treatment for my present condition and for any future condition(s) for which I seek treatment. I will immediately inform the therapist so that the pressure and/or strokes may be adjusted to my level of comfort.
- I further understand that Massage Therapy should not be construed as a substitute for medical examination, diagnosis, or treatment and that I should see a physician, chiropractor, or other qualified medical specialist for any mental or physical ailment of which I am aware.
- Because Massage should not be performed under certain medical conditions, I affirm that I have stated all my known medical conditions, and answered all questions honestly. I agree to keep the therapist updated as to any changes in my medical profile and understand that there shall be no liability on the therapist’s part should I fail to do so.
- **Cupping/Gua Sha:** I understand that cupping therapy will leave bruise-like marks that will last several days depending on the severity of my condition. While most marks fade and disappear after a few days, there are times when marks could take up to 15 days to clear and in rare cases, it has been reported that marks have taken up to 21 days to fully clear.
  - **Contraindications:** 1. Hemophilia or other bleeding/clotting disorders 2. Patients taking blood thinners 3. Weak patients or those who have been ill 4. Abdomen and lower back on pregnant women 5. Diabetics. Especially those with uncontrolled blood sugar as they may not be able to feel pain properly 6. Those who are unable to experience heat or pain properly 7. Those who have circulatory conditions 8. Those who are unsure if their condition is contraindicated should seek guidance from their primary care physician prior to receiving cupping therapy.
  - I understand that bruising, discoloration and/or soreness will likely occur following this treatment and may take days or weeks to fully resolve. I further understand that the above-listed conditions are contraindicated for cupping therapy and I have informed my therapist/physician of any and all medical conditions, even those not listed as contraindications. I further understand that there is a potential for burns and/or blisters due to the fire/heat aspect of the treatment. This is a rare but not unexpected occurrence. **(Initials)** \_\_\_\_\_
  -
- **Improper Conduct:** This is a Therapeutic Massage session and any sexual remarks or advances will terminate the session and understand I will be liable for payment of the scheduled treatment. I understand the Massage Therapist practitioner reserves the right to refuse services to me for any reason that the Therapist deems necessary. Male and female modest will be considered will not be exposed or touched at any time. Professional draping will be used for your privacy and comfort. Our policy requires therapists to leave the room prior to disrobing/undressing and use draping with sheets/ blankets at all times during every massage session. **(Initials)** \_\_\_\_\_
